FORD & HILLER

SELL OUT

One of the Largest and Most Valuable Phosphate Interests in the State Changes Hands

It has been known for some time that the Dutton Phosphate Co., of Gainesville, were negotiating with Messrs. Ford and Hiller, of this city, for the purchase of their entire phosphate business. The deal was closed today and we are authorized to state that the Dutton Phosphate Company now owns the business of Ford & Hiller, and that the last mentioned firm, after today, ceases to exist as miners of phosphate, though it will require several months for them to entirely wind up their brokerage business, of contracts in course of fulfillment.

Messrs. Ford and Hiller began business December, 1896, and have steadily added to and increased their holdings until they deeded to the Dutton Co. approximately 18,000 acres of land, much of it containing valuable deposits of high grade hard rock phosphate. They now, and have for some time, operated six plants and all rapid producers of rock. They shipped 60,000 tons of rock per year. Their northernmost plant is at Fort White, the most southern one at Hernando. Two are located at Newberry and two at Early Bird. Ford & Hiller have been liberal in the operating of their business, have employed the best men and paid the highest salaries. They have been free in their personal expenditures, leaving as a firm and individuals about \$100,000 per annum in Ocala. Their business system was one of the most complete in the state and to this is largely due their splendid success.

Ocala will sadly miss this firm and it is to be hoped that the bulk of the business will eventually drift back this way. Mr. Dale, the company's expert bookkeeper, will go with the purchasers to Gainesville, and it is thought Mr. Thomas Sexton, the general superintendent, will remain with them.

As to the future movements of Messrs. Ford and Hiller, Mr. Ford will remain in Ocala, and pursue some other business, and Mr. Hiller will remain here for the present, but will very likely move away in the future.

The Dutton Phosphate Company is now one of the strongest phosphate companies in the state and controls about sixteen plants. They may at some time be in shape to control the price of Florida hard-rock phosphate and obtain the prices that our miners should and could have had long ago if a proper concert of action had been inaugurated and maintained.

This paper regrets exceedingly the deal that has taken this business out of our city, but wishes Mr. Ford and Mr. Hiller all success in whatever line of business they may engage in in future, and that they will succeed, their past successes are a guarantee.

POLICE COURT

E. S. O'Bryan, a traveling man for an Ohio soda fountain manufacturer, fell by the wayside yesterday from looking upon the wine when it was red, thus incurring the displeasure of bruised ordinances. The mayor assuaged the wrath of the law to the extent of \$5 and costs. It seems this man had fine home training and good educational advantages.

DISASTROUS WRECKS

Carelessness is responsible for many a railway wreck and the same causes are making human wrecks of sufferers from Throat and Lung troubles. But since the advent of Dr. King's New Discovery for Consumption, Coughs and Colds, even the worst cases can be cured, and hopeless resignation is no longer necessary. Mrs. Lois Cragg of Dorchester, Mass., is one of the many whose life was saved by Dr. King's New Discovery. This great remedy is guaranteed for all Throat and Lung diseases by the Anti-Monopoly Drugstore. Price 50c. and \$1. Trial bottles free.

THE CRAP SHOOTERS

Three of them, mere boys, Jesse Lake, Levi Robinson and Lucius Potter, all colored, got \$10 and costs for the combination. Two paid and one was seeking the aid of a friend. The amount on which they were calling "come-ll" was the munificent pile of 8 and 5 cents. Ain't this kind of justice a little steep?
